FEASIFY TEST EXECUTION SUMMARY & METRICS DASHBOARD

Document ID: FEASIFY-DOC-011
Version: 1.0.0
Date: November 10, 2026
Author: Lead QA Orchestrator & Multi-Agent Quality Team
Classification: Quality Assurance Executive Dashboard

1. Executive Testing Dashboard

METRIC	EMPIRICAL RESULT	NOTES / DETAILS
Total Modules Identified	**14**	Auth, RBAC, Dashboard, Proposals, Financials, AI, Name Checker, Map, Adviser Review, AI Grading, Chairperson Admin, Institutional Overview, Audit Trail, PDF Export
Total Test Cases Planned	**67**	42 manual/functional scenarios + 25 comprehensive automated cases
Total Tests Executed	**67**	100% of planned test scenarios executed
Passed Tests	**60**	37 manual/functional + 23 comprehensive automated
Failed Tests / Confirmed Vulnerabilities	**7**	5 manual/functional + 2 automated flaw proofs
Blocked Tests	**0**	No testing was blocked by environmental failure
Not Executed Tests	**0**	All target paths evaluated
Confirmed Critical Bugs (P1)	**2**	Plaintext password in DB; unauthenticated status mutation endpoint
Confirmed High-Severity Bugs (P2)	**4**	Settings ReferenceError crash; client proposal quota bypass; unauthenticated AI usage; hardcoded chairperson email
Confirmed Medium-Severity Bugs (P3)	**4**	Broken ESLint flat config; Adviser dashboard null dereference; hardcoded EmailJS key; wildcard CORS
Confirmed Low-Severity Bugs (P4)	**3**	Sandbox whitespace issue; 3.36 MB bundle size; ContributorItem type mismatch
Automated Tests Passed	**105**	82 existing repo tests (DTI/SEC/Math/Exemplars) + 23 comprehensive suite
Automated Tests Failed	**2**	Flaw proof tests in QA suite (unauthenticated PUT + sandbox space)
Production Build Status	**PASSED**	Vite 7.3.2 built client in 50.32s; warnings on bundle size
Overall Test Pass Rate	**89.6%**	`(60 / 67) × 100` across planned test matrix
Readiness Assessment	**CONDITIONALLY READY**	Ready for Capstone Demonstration; Blocked for Live Production

$$\text{Pass Rate} = \frac{\text{Passed Tests}}{\text{Executed Tests}} \times 100 = \frac{60}{67} \times 100 = 89.55% \approx 89.6%$$

2. Multi-Agent Orchestration Status Report

The specialized testing agents completed their evaluations according to the dependency-aware execution model:

AGENT ID	ASSIGNED AREA	FINAL STATUS	TESTS EXECUTED	BUGS DISCOVERED	PRIMARY VERIFICATION OUTCOME
Agent 01	System Architecture	**Completed**	14 modules	0	Full tech stack identified; discovered Leaflet (No Google Maps)
Agent 02	Frontend Functional	**Completed**	18 tests	2	Verified UI forms, buttons; discovered `Settings.tsx` ReferenceError
Agent 03	Backend & API	**Completed**	15 tests	3	Mapped 14 REST endpoints; proved unauthenticated status update
Agent 04	Database & Integrity	**Completed**	8 tests	2	Discovered plaintext password stored in Firestore `users` collection
Agent 05	Security & Access Control	**Completed**	8 tests	4	Audited OWASP Top 10; hardcoded chairperson email privilege escalation
Agent 06	Proposal Management	**Completed**	10 tests	2	Verified 3-proposal limit; proved direct client write quota bypass
Agent 07	DTI/SEC Name Checker	**Completed**	12 tests	1	Verified BNRS/eSPARC links; verified brand collision handling
Agent 08	UI/UX & Usability	**Completed**	8 tests	1	Verified responsive viewports; flagged 3.36 MB bundle bloat
Agent 09	Performance & Stress	**Completed**	4 tiers	0	Benchmarked 1 to 50 concurrent users; measured 4ms baseline
Agent 10	End-to-End Integration	**Completed**	8 scenarios	0	Verified full lifecycle from student submission to adviser review
Agent 11	Automation & Regression	**Completed**	107 tests	2	Executed existing test suites and generated machine evidence log
Agent 12	Documentation	**Completed**	12 documents	0	Consolidated QA package, CSV registers, and final QA report

3. Automated Test Evidence Log Traceability

Machine-readable execution logs containing exact high-resolution timestamps, HTTP response codes, latency figures, and error payloads are archived in: `docs/testing/evidence/qa_suite_execution_log.json`
